Data Modelling and Form Design

Aim

To design and develop a **Library Book Issue Form** using Zoho Creator by creating a structured form, applying appropriate validations, and generating a report for managing library book issue records.

Theory

Data modelling and form design involve organizing data into suitable fields and sections for efficient collection and management. In Zoho Creator, forms can be created using different field types such as Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox.

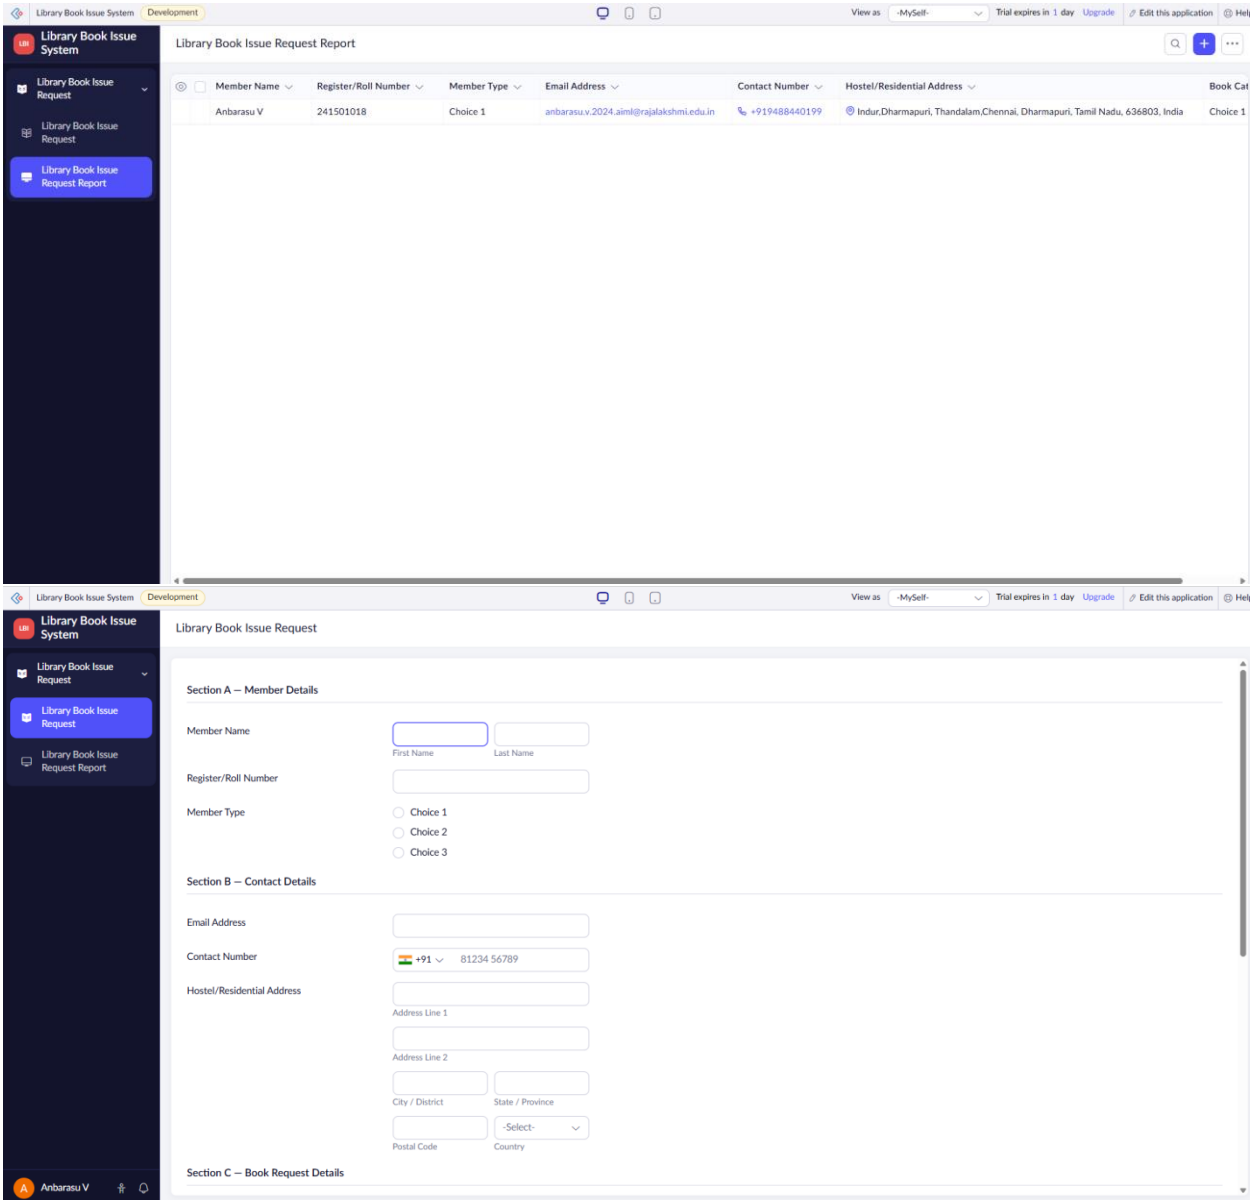

In this experiment, a **Library_Book_Issue_Form** is designed to collect student details, book information, issue details, and return information. The form is divided into four sections: **Student Details, Book Details, Issue Details, and Return Details**.

Validations are applied to ensure accurate data entry, including mandatory fields, valid student ID, valid book ID, issue date, expected return date, and availability of the book. The submitted data is displayed in the **Library_Book_Issue_Report** for reviewing and managing issued books.

Procedure

1. Open Zoho Creator and create the **Library Book Issue Management** application.
2. Create the **Library_Book_Issue_Form**.
3. Add the required fields for student, book, issue, and return details.
4. Organize the fields into the four specified sections.
5. Configure mandatory fields and apply the required validation rules.
6. Save and preview the form.
7. Enter sample student and book details and submit the form.
8. Create the **Library_Book_Issue_Report** and verify the submitted records.
9. Filter the records based on book ID, student ID, and issue/return date for library management.

Screenshots

Result

The **Library Book Issue Form** was successfully created in Zoho Creator with a structured data model, appropriate field validations, and organized sections. The submitted library book issue records were successfully stored and displayed in the **Library_Book_Issue_Report** for effective tracking and management of issued books.
